### Foster and Gehry Reveal Designs for Battersea Power Station

"The Skyline" on "The Electric Boulevard" / Foster + Partners. Image Courtesy of Battersea Power Station

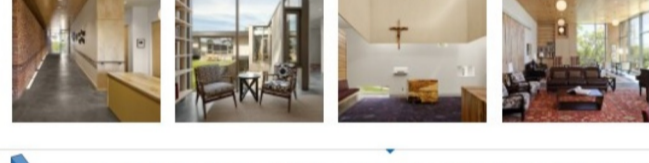

As phase three of London's Battersea Power Station regeneration, Foster + Partners has collaborated with Gehry Partners to design the 42-acre development's primary entrance. Together, the duo has envisioned "The Electric Boulevard" - a massive gateway connecting the Northern Line Extension station to the Power Station, which will be formed by an undulating Foster-designed tower known as "The Skyline" and Gehry's five-building "Prospect Place."
Housing more than 1,300 homes and over 350,000 square feet of retail and high street space, the boulevard is expected to become one of London's most distinguished high streets.

### Exploring Post Earthquake Reconstruction: 2013 AIM Competition Awards Announced

Winning Entry: Architecture Renovation Award. Image Courtesy of AIM

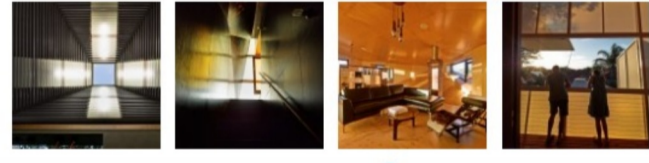

Architects in Mission (AIM) recently announced the winners for their 2013 competition with the topic, Post Earthquake Reconstruction, Ya'an Sichuan - Rebuild Panda's Hometown from the Earthquake. The Ya'an Earthquake occurred at 08:02 Beijing Time on the 20th April 2013. The epicenter was located in Lushan County, Ya'an, Sichuan, about 116km (or 72 miles) from Chengdu (along the Longmenshan Fault) in the same province that was hit heavily by the 2008 Sichuan earthquake. For this year's competition, AIM asked participants to pay particular attention to the master planning of the future development. Statnil announced on Thursday that "The jury...

### Wingårdhs Bests Snohetta, Foster + Partners in Statoil Competition

© Wingårdhs

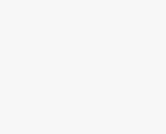

A jury of seven, consisting of three architects and four Statoil employees, unanimously chose Wingårdhs' design proposal—dubbed "E=mc2"—for the company's campus at Forus West in Norway. Four other firms were shortlisted along with Wingårdhs: Foster + Partners (UK) together with Space Group (Norway), OMA (the Netherlands), Snohetta (Norway) and Helen & Hard (Norway) together with SAHAA (Norway). OMA, however, pulled out of the competition before the final submission.

The competition consisted of a proposal for an office building for 3500 work places and a masterplan for the entire Statoil property at Forus West. Wingårdhs' design features an elliptical, chamfered building that tapers to 16 stories, set within a masterplan that will give the company a high degree of flexibility for future development. Statoil announced on Thursday that "The jury...

More information about Wingårdhs' winning proposal and images of the other teams' proposals can be found after the break.
